Re: Acceptance of Amended Notice of Intention to Commence Small Mining Operations, Cambrillic Natural Stone, L.C., Cambrillic Mine, S/027/079, Millard County, Utah

Dear Mr. Pappas:

Thank you for your amended Notice of Intention to Commence Small Mining Operations, received March 15, 2000. The amendment changed the location of the Cambrillic proposed small mining project from Section 14, to Section 23 in Township 17 South, Range 13 West, Millard County, Utah. The amendment is considered complete and no other information is required at this time. Approval by this Division does not constitute approval from any other agency that may be involved. **As this project is located on BLM managed lands, you must have BLM written approval before commencing with your operation.**

You indicated to our staff that there is mining going on in this vicinity and that the BLM informed you the mining was taking place in a "BLM community pit." Before you commence any mining, please carefully document any previous disturbance with dated photographs for which you do not want to be held responsible. Any area you disturb or any existing disturbance that you may re-impact will then become your responsibility and be counted in your total acreage.

As no variance were requested for this amendment, all conditions outlined in the Division's original acceptance letter still remain. As a reminder, please give special consideration to item #10 of the "Operation and Reclamation Practices" (SMO-1). Stockpiling topsoil material prior to beginning your mining operation will help ensure successful revegetation efforts upon final reclamation of the minesite. If the area being mined is a solid rock outcrop, or if the land surface is very rocky, then soil stockpiling is probably not possible. However, even the first few inches of undeveloped material is worth saving to aid in later revegetation efforts, and future regulatory release from reclamation requirements.

Should you wish to expand your operation beyond the five acre limitation, please notify this office as soon as possible to discuss the necessary permitting requirements. A large mining notice could take from six to twelve months or longer to receive approval.

Thank you for your cooperation. When in the area, a member of the Division staff will examine the site. Best wishes with your mining operation.

Sincerely,

A handwritten signature in cursive script that reads "Tom Munson".

Tom Munson
Senior Reclamation Specialist
